| Effectiveness of annealing                                     | ASTM F2729-96<br>(Sec. 4.2.2 (M))                 | With a tungsten-carbide nozzle, scratch twice around the inside rim of the article. Then scratch an "X" across the inside rim of the outside surface of the article. All scratches are to be made using sufficient pressure to just penetrate the surface of the glass. Fill each article with water at the same room temperature as the glass. Wait 15 minutes. Then inspect the water and examine each piece for fractures. Each article is to fracture. Record the number of fractures, if any, for each test.                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | M | PA33 |
| Thermal shock                                                  | ASTM F2729-96<br>(Sec. 4.2.2 (M) &<br>4.3.1 (C4)) | <p>Modification: expanded scope to all other glass products in addition to food containers.</p> <p>Soak test unit in hot water (180 °F) for 15 min. Prepare a cold-water bath at 21 ± 1 °C (70 ± 2 °F).</p> <p>Prepare a hot bath at 71 ± 1 °C (160 ± 2 °F).</p> <p>Immerse the sample completely in the hot bath and allow it to soak for 1 min at 71 ± 1 °C.</p> <p>Transfer the sample to the cold bath and immerse for at least 30 s.</p> <p>Remove the sample from the cold bath and examine the sample for any cracking.</p> <p>Note:</p> <ul style="list-style-type: none"><li>the hot water that collects within the container during the first immersion shall be retained in the container</li><li>the container shall be removed from the hot bath and the time of transfer from the hot bath to the cold bath shall be 15 ± 1 s</li></ul> <p>Modification: sampling procedure not followed and expanded scope to all other glass products in addition to food containers.</p> | M | PA33 |
