EXECUTIVE SUMMARY:

Test content		Result/finding	
CA 16, 18 & Caudalpin on non-toothbearing glass/metal surfaces		Moist Heat	
Efficiency of erasing	ASTM F2170-03 Sec. 4.2 (NAC)	With a tungsten carbide eraser, scratch once around the inside cracks of the articles. Then scratch 10 "x" marks on the outside and bottom surface of the articles. All scratches are to be made using sufficient pressure to just penetrate the surface of the glass plates. Place articles with water at the same room temperature as the glass. Wait 15 minutes, then empty the water and examine each piece for fractures. Shut down all fractures. Report the number of fractures, if any, for each.	Pass
Thermal shock	ASTM F2170-03 Sec. 4.2 (NAC) ASTM C149	Modification: expanded scope to all other glass products in addition to dental crowns Small test pieces or break off tested per section 4.2.1 of the standard test at 21 ± 1 °C (70 ± 2 °F). Transfer a hot bath at 75 ± 1 °C (165 ± 2 °F) immediately to the sample in the hot water bath and allow to soak for 5 min ± 15 s. Transfer the sample to the cold bath, and immerse for at least 30 s. Remove the sample from the cold bath and examine the sample for any cracking. Note: The hot water that collects within the container during the first immersion shall be retained in the container through the second immersion. The time of transfer from the hot bath to the cold bath shall be 15 ± 5 s. Modification: sampling procedure not followed and expanded scope to all other glass products in addition to dental crowns	Pass
