

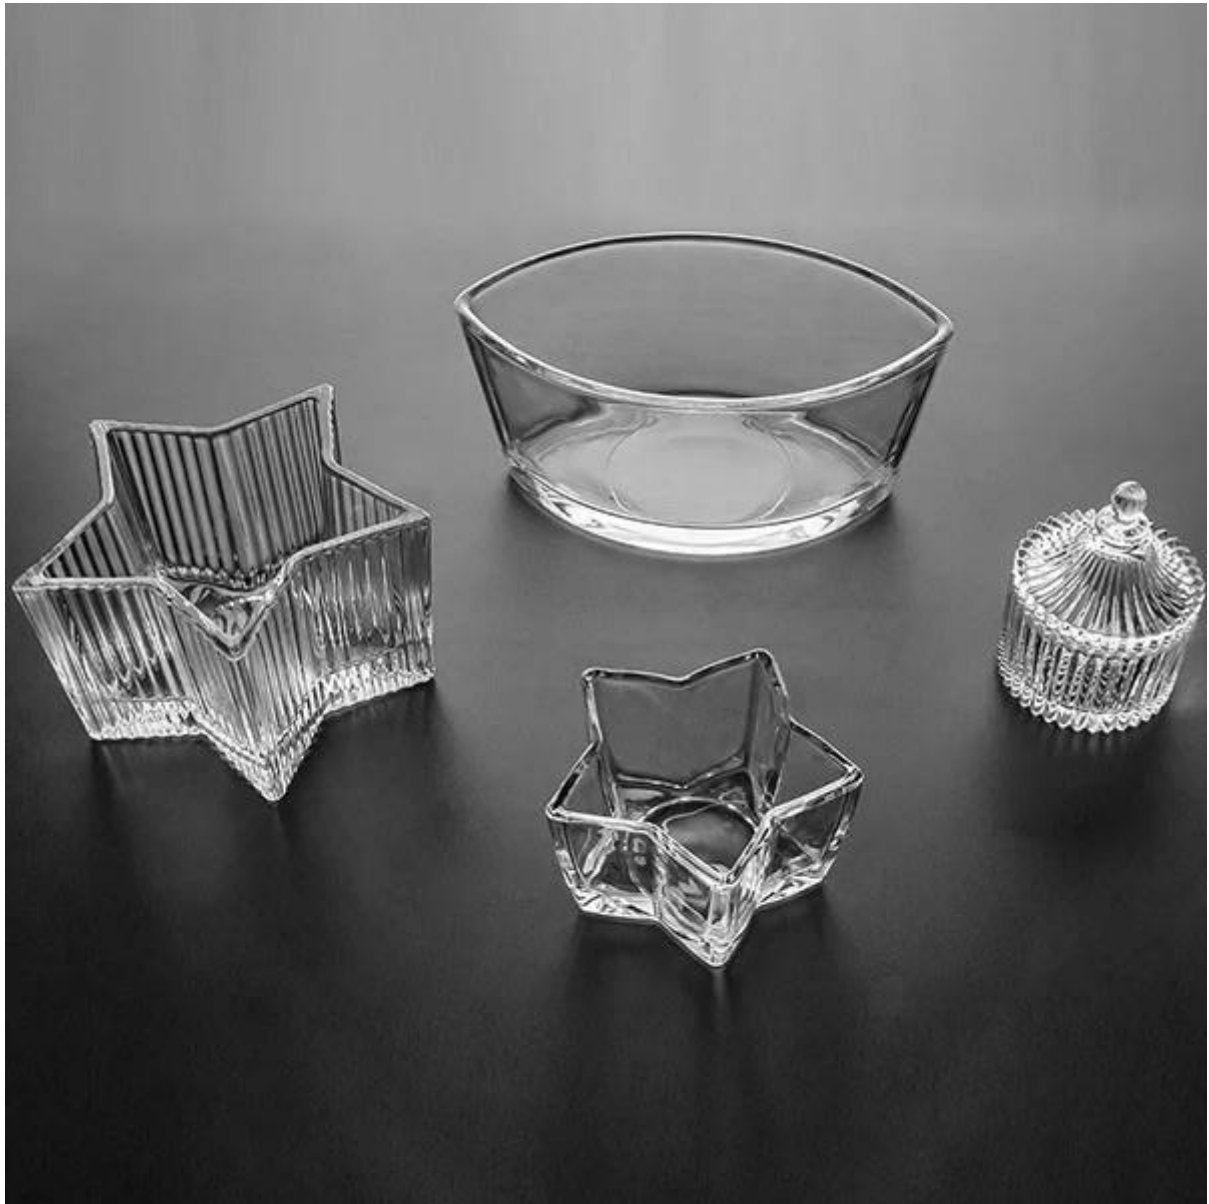

Figure 10. Polycarbonate (PC) containers for food storage.

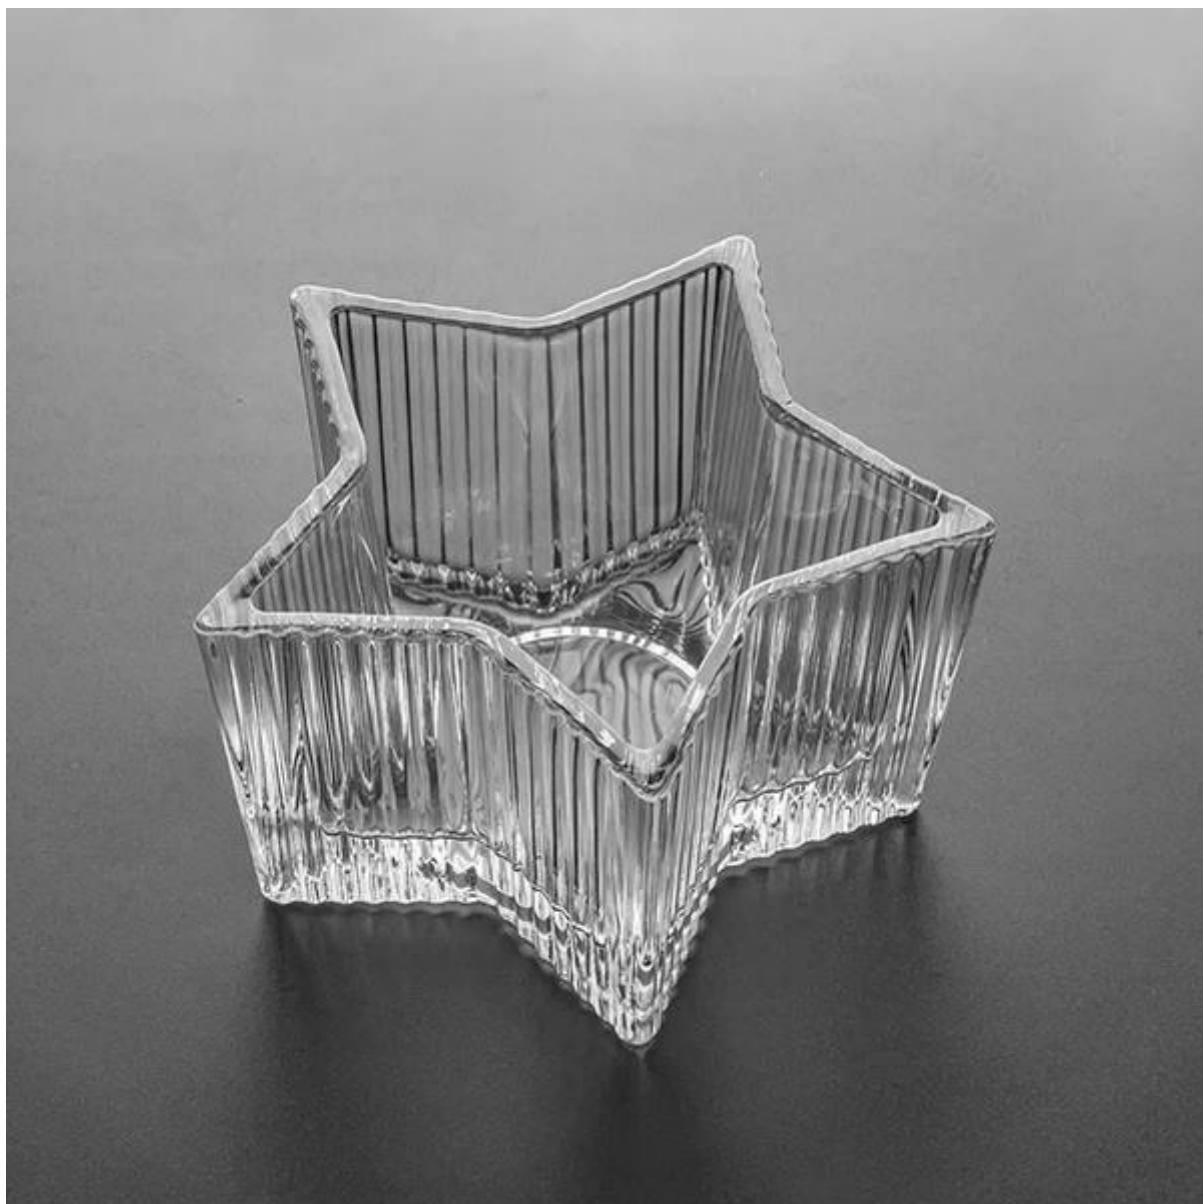

Polycarbonate (PC) containers are commonly used for food storage. They are durable, lightweight, and resistant to impact. However, they may contain bisphenol A (BPA), which can leach into food. To ensure safety, look for BPA-free labels. The FDA and California Proposition 65 (Cal Prop 65) provide guidelines for BPA levels. The American Society for Testing and Materials (ASTM) also provides standards for PC containers.
