California Proposition 65, also known as the Safe Drinking Water Act, is a law that requires businesses to provide information about the presence of certain chemicals in their products. The law is designed to help consumers make informed decisions about the products they buy and use. The law is a key part of California's efforts to protect public health and the environment.

[California Proposition 65](#) is a law that requires businesses to provide information about the presence of certain chemicals in their products. The law is designed to help consumers make informed decisions about the products they buy and use. The law is a key part of California's efforts to protect public health and the environment.
