

[illegible]

The diagram shows a sequence of 100 small rectangular boxes arranged in two rows of 50. The top row contains 46 black boxes followed by 4 red boxes. The bottom row contains 50 black boxes. A blue horizontal line is drawn under the 4th red box in the top row, and a red horizontal line is drawn under the 5th red box in the top row. These two lines intersect at the 4th red box, defining a 4-bit error window.
