| Effectiveness of annealing | ASTM F2179-20 Sec. 4.2 (M40)           | With a long-term candle jar, scratch once around the inside knuckle of the jar. Then scratch an "X" across the entire inside bottom from the center to the edge. The jar is to be immersed in a cold water bath at 21 ± 1 °C (70 ± 2 °F) for 15 minutes, then remove the jar and examine each piece for fractures. That show no fractures. Report the number of fractures, if any, for each test.                                                                                                                                                                                                                                                                                                                                                                                                                                 | M PASS    |
| Thermal shock              | ASTM F2179-20 Sec. 4.2 (M40) ASTM C149 | Modification: expanded scope to all other glass products in addition to candle containers.
