

8oz Blue Scented Candle Holder Supplier

As experienced [China Scented candle holder supplier](#), Cupwind is always looking to find new craft and new decorations to make the candle holders different. This mix color spray is newly developed, it suitable for 8oz wax filling. All paint we use is eco-friendly and environmental.

The 8oz candle vessel is popular used as scented candles container, perfect size for votive vessel. It's a regular production item in our workshop. Cupwind keeps stock all the year round. The MOQ for this glass can be as low as 2000pcs per each color.

We have matching wooden lid and metal lid for this 8oz votive candle holder. The material of the wood is available in MDF, Pine, Bamboo, Beech, Walnut, Paulownia, Acacia, Rubber wood, Red Oak, White Oak, European ash, Maple etc. Material of the metal is available in Tin, Stainless steel, Zinc Alloy etc.

Cupwind is the leading [china scented candle holder factory](#), we accept OEM/ODM custom design. We can create your own shape with/without a brand name. The decoration available for spraying, electroplating, metallic painting, decal, hot stamping, silk screen, sandblast, water transfer etc.

Gift Box.

Gift Box

There are more candle accessories we can supply besides wooden lids. We can sell finished products with candles and gift boxes upon request.

We wrap each candle glass by an opp bag to keep away from dust, then corrugated cartons with cross board dividers. Wooden pallets are always efficient for LCL shipments, and we will add a cotton net in the door place to protect from falling when opening the container door.

Brand name:	CUPWIND®		
Re-test:	Yes: <input type="checkbox"/> No: <input checked="" type="checkbox"/>	Charge Vendor:	Yes: <input checked="" type="checkbox"/> No: <input type="checkbox"/>
Previous Report No.:	/		

EXECUTIVE SUMMARY:

Test content		Result/Rating	
CA 65 Lead & Cadmium on non-food/beverage glassware-exterior		Meet/Pass	
Effectiveness of annealing	ASTM F2179-20 Sec. 4.2 (Mod)	With a tungsten carbide scribe, scratch once around the inside knuckle of the article. Then scratch an "X" across the entire inside bottom surface of the article. All scratches are to be made using sufficient pressure to just penetrate the surface of the glass. Fill each article with water at the same room temperature as the glass. Wait 15 minutes, then empty the water and examine each piece for fractures. Shall show no fractures. Report the number of fractures, if any, for each test. Modification: expanded scope to all other glass products in addition to candle containers.	M PASS
Thermal shock	ASTM F2179-20 Sec. 4.2 (Mod) / ASTM C149	Shall not crack or break after tested per below - prepare a cold-water bath at 21±1.1°C (70±2°F). - prepare a hot bath at 71±1.1°C (160±2°F) - immerse the sample completely in the hot water bath and allow to soak for 5 min ± 10 s. - transfer the sample to the cold bath, and immerse for at least 30 s. - remove the sample from the cold bath and examine the sample for any cracking. Note: - the hot water that collects within the container during the first immersion shall be retained in the container through the second immersion - the time of transfer from the hot bath to the cold bath shall be 15 ± 1 s Modification: sampling procedure not followed and expanded scope to all other glass products in addition to candle containers.	M PASS

REMARK:

- No enclosed protocol for test results in this report.

All of our glass candle jar are tested by a third party. Usually we go with Cali 65 Pro tests, ASTM (Annealing and Thermal Shock)tests, Lead and Cadmium tests.
