

Amber Apothecary Candle Jar with Tin Lid for Scented Candles

Our premium apothecary candle jar is embossed with beautiful pattern, the tin lid is printed with colors.

the candle glass is sprayed in grey which is for [pumpkin chai](#) scented candles.

This embossment apothecary candle glass jar is made by I.S. Machine craft, the MOQ is 30000pcs.

There is a frame on the glass jar so that we can add sticker on to it.

The lid is made of metal tin, the patterns and colors is customize available with us.

Our strength is that we have our own decorating factory to do a bunch of decorations on the containers.

Such as silkscreen printing, [decal printing](#), electroplating, color sprays, [iridescent](#) plating etc.

Cupwind is professional [apothecary candle jar manufacturer](#) in china, we accept OEM/ODM custom design and we can create your own shape with/without a brand name.

furthermore, we offer candle accessories along with candle holders, such as metal lids, wooden lids, [gift box](#) etc.

Wick Trimmer Cutter

Zinc Alloy Lid

Wooden Lid

Neck

Stopper

Reed

Gift Box.

Gift Box

With years of experience working on candle holders, Cupwind knows how to protect our products.

each candle holder glass was wrapped by an opp bag to keep the dusts away, then corrugated cartons with cross board dividers.

Wooden pallets are always efficient for LCL shipments, and we will add a cotton net in the door place to protect from falling when opening the container door.

Quality Assure

We have our own trained and experienced Qc team to check on product quality from the begining of production till the end, we will have interal QC report in english to show you before we ship out.

All of our glass candle jars are tested by a third party. Usually we go with Cali 65 Pro tests, ASTM (Annealing and Thermal Shock)tests, Lead and Cadmium tests.

EXECUTIVE SUMMARY:

Test content		Result/Rating
CA 65 Lead & Cadmium on non-food/beverage glassware-exterior		Meet/Pass
Effectiveness of annealing	ASTM F2179-20 Sec. 4.2 (Mod)	M PASS
	<p>With a tungsten carbide scribe, scratch once around the inside knuckle of the article. Then scratch an "X" across the entire inside bottom surface of the article. All scratches are to be made using sufficient pressure to just penetrate the surface of the glass. Fill each article with water at the same room temperature as the glass. Wait 15 minutes, then empty the water and examine each piece for fractures. Shall show no fractures. Report the number of fractures, if any, for each test.</p> <p>Modification: expanded scope to all other glass products in addition to candle containers.</p>	
Thermal shock	ASTM F2179-20 Sec. 4.2 (Mod) / ASTM C149	M PASS
	<p>Shall not crack or break after tested per below</p> <ul style="list-style-type: none">- prepare a cold-water bath at $21 \pm 1.1^{\circ}\text{C}$ ($70 \pm 2^{\circ}\text{F}$).- prepare a hot bath at $71 \pm 1.1^{\circ}\text{C}$ ($160 \pm 2^{\circ}\text{F}$)- immerse the sample completely in the hot water bath and allow to soak for $5 \text{ min} \pm 10 \text{ s}$.- transfer the sample to the cold bath, and immerse for at least 30 s.- remove the sample from the cold bath and examine the sample for any cracking. <p>Note:</p> <ul style="list-style-type: none">- the hot water that collects within the container during the first immersion shall be retained in the container through the second immersion- the time of transfer from the hot bath to the cold bath shall be $15 \pm 1 \text{ s}$ <p>Modification: sampling procedure not followed and expanded scope to all other glass products in addition to candle containers.</p>
