**EXECUTIVE SUMMARY:**

Test content		Result/Rating		
CA 66 Lead & Cadmium on non-bottle/beverage glassware-external		Meet/Pass		
Ethicalness of annealing	ASTM T279-20 Sec. 4.2 (Mod)	With a tungsten oxidized scriber, scratch once around the inside knuckle of the article. Then scratch an "X" across the entire inside bottom surface of the article. If scratches are to be made using sufficient pressure to just penetrate the surface of the glass. Fill each article with water at the same room temperature as the glass. Wait 15 minutes, then empty the water and examine each piece for fractures. Shall show no fractures. Report the number of fractures, if any, for each test.	M	PASS
Thermal shock	ASTM T279-20 Sec. 4.2 (Mod) ASTM C136	Modified: expand and contract to other glass products in addition to cinderle containers. Shall not crack or break after being cooled below prep. a cold-water bath $21 \pm 1.5^{\circ}\text{F}$ ( $7.0 \pm 0.2^{\circ}\text{C}$ ). - Immerse the sample in the cold water bath for 15 minutes. - Immerse the sample completely in the hot water bath and allow to soak for 5 min $\pm 10$ s. - Transfer the sample to the cold bath, and immerse for at least 15 s. - Remove the sample from the cold bath and examine the sample for any cracking. Note: - The hot water that collects within the container during the test immersion shall be retained in the container through the second immersion. - The time of transfer from the hot bath to the cold bath shall be 15 s. Modification: sampling procedure not followed and expanded scope to all other glass products in addition to cinderle containers.	M	PASS
