OVERALL RATING

PASS
FAIL
DATA

Effectiveness of annealing	ASTM F2179-20 Sec. 4.2 (Mod)	With a tungsten carbide scribe, scratch once around the inside knuckle of the article. Then scratch an "X" across the entire inside bottom surface of the article. The scratches are to be made using sufficient pressure to just penetrate the surface of the glass. Fill each article with water at the same room temperature as the glass. Wait 15 minutes, then empty these articles and dry them for 15 minutes. Inspect for fractures. Report the number of fractures, if any, for each test.	M	PASS
Thermal shock	ASTM F2179-20 Sec. 4.2 (Mod) / ASTM C149	Modification: expanded scope to all other glass products in addition to candle containers. Soak right-angle or oval containers in cold water, prepare a cold-water bath at 21±1.1°C (70±2°F). - prepare a hot bath at 71±1.1°C (160±2°F) - immerse the sample completely in the hot water bath and allow to soak for 5 min ± 10 s. - transfer the sample to the cold bath, and immerse for at least 30 s. - remove the sample from the cold bath and examine the sample for any cracking. Note: - the hot water that collects within the container during the first immersion shall be retained in the container through the second immersion - the time of transfer from the hot bath to the cold bath shall be 15 ± 1 s Modification: sampling procedure not followed and expanded scope to all other glass products in addition to candle containers.		PASS

All the orders of glass candle jars are by a third party. Usually we go with Cali 65 Pro TM (Annealing and Thermal Shock) tests. Cadmium tests.

Factory Show

Cupwind has 10000 square meters decorative workshop, 20 kinds of different decorative machines, 20 years experience in the decorative area, 20 stable glass factories supporting various glass vessels.

Packaging and pallet process

We wrap each candle holder glass by an opp bag to keep away from dust, then corrugated cartons with cross board dividers. Wooden pallets are always efficient for LCL shipments, and we will add a cotton net in the door place to protect from falling when opening the container door.
