EXECUTIVE SUMMARY:

Test content		Result Rating	
CA 65 Lead & Cadmium on non-food beverage glassware-exterior		Meet/Pass	
Effectiveness of annealing	ASTM F2170-20 Sec. 4.2 (Mod)	With a tungsten carbide scribe, scratch once around the inside knuckle of the article. Then scratch an "X" across the entire inside bottom surface of the article. All scratches are to be made using sufficient pressure to just penetrate the surface of the glass. Fill each article with water at the same room temperature as the glass. Wait 15 minutes, then empty the water and examine each piece for fractures. Shall show no fractures. Report the number of fractures, if any, for each test. Modification: expanded scope to all other glass products in addition to candle containers.	M PASS
Thermal shock	ASTM F2170-20 Sec. 4.2 (Mod) / ASTM C149	Shall not crack or break after tested per below: - prepare a cold-water bath at 21±1.1°C (70±2°F). - prepare a hot bath at 71±1.1°C (160±2°F). - immerse the sample completely in the hot water bath and allow to soak for 5 min ± 10 s. - transfer the sample to the cold bath, and immerse for at least 30 s. - remove the sample from the cold bath and examine the sample for any cracking. Note: - the hot water that collects within the container during the first immersion shall be retained in the container through the second immersion. - the time of transfer from the hot bath to the cold bath shall be 15 ± 1 s. Modification: sampling procedure not followed and expanded scope to all other glass products in addition to candle containers.	M PASS

REMARK:

- No enclosed protocol for test results in this report.

Cupwind knows to how to protect each piece of products, we wrap each glass by opp bag to get away from dusts, each candle jar is separated by egg dividers from rubbing each other, wooden pallet is preferable while in transportation, in the end, we add a cotton net at the container door place to protect cartons from falling down.
